

IGNITOR® ELECTRONIC IGNITION

For nearly forty years, the Ignitor has proven itself in applications ranging from race cars to tractors. The Ignitor replaces breaker points and troublesome factory electronic ignitions with a dependable, self contained and maintenance free electronic ignition system. The Ignitor has been called the “stealth” ignition because of its quick installation and nearly undetectable presence under your distributor cap. There is no “black-box” to clutter the engine compartment. For optimal performance, use the Ignitor with Flame-Thrower 40,000 volt coils.

FEATURES

- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- 2:1 improvement over “points” in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit . . .no points to burn, . . .no moving parts to wear out.
- Epoxy molding makes our module impervious to dirt, oil, grease and moisture.
- Stable timing . . .no need for any adjustments.
- Will trigger most multi-spark CD ignitions.
- Available for 6 and 12-volt negative and positive ground systems.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

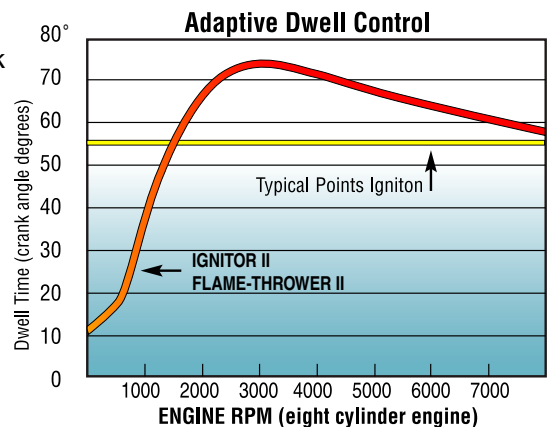

Ignitor® II ELECTRONIC IGNITION

The Ignitor II has many of the same great features that the Ignitor has, but its smarter. Ignitor II units sense the coil current level and use a powerful micro controller to adjust the dwell. Variable dwell helps to maintain peak energy throughout the entire RPM range. Ignitor II systems develop up to 4 times more energy between 3000 and 5000 RPM than standard ignition systems. High RPM performance is improved when used with the Flame-Thrower II super low resistance (0.6 ohms) 45,000 volt coils.

FEATURES

- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Develops on average 4 times more available energy between 3000 and 5000 RPM, and 2 times more available plug voltage.
- Compensates for inherent electronic delay by adjusting the spark timing throughout the entire RPM range.
- Synchronized peak current and spark timing reduces heat build-up.
- Senses startup and develops more energy for quicker, easier starting.
- Built in reverse polarity and over current protection shuts down the system, preventing component damage.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

Ignitor[®] III **ELECTRONIC IGNITION**

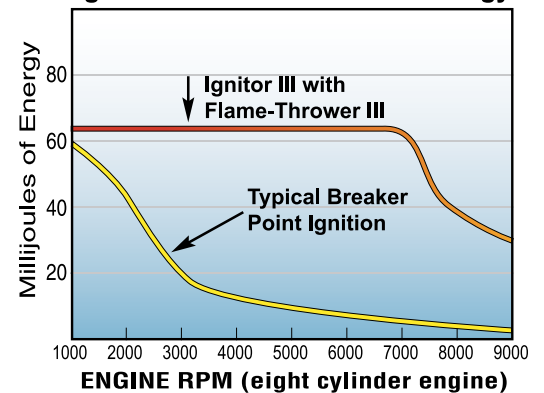

Our Ignitor III ignition module is designed for the serious performance enthusiast who demands serious power. You have seen the performance increases the Ignitor and Ignitor II series of electronic ignitions have brought. Now get ready for more... 5 times more spark energy than a typical points system. Ignitor III modules provide ignition box performance... without the "box"! For the maximum Ignitor III benefit, select one of our Flame-Thrower III or HC ignition coils from the coil section of this catalog.

FEATURES

- Multiple sparks thru the entire RPM range.
- Integrated digital REV limiter with LED feedback for precise RPM setting.
- Memory safe function stores settings eliminating unintended changes to Rev limit.
- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil performance and module reliability.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and increases energy for quicker, easier starting.
- Thermal clad surface mount construction for superior reliability.
- Built-in reverse polarity and over current protection shuts down the system, preventing component damage.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

Ignitor III vs. Breaker Point Energy

Integrated adjustable REV Limiter with LED feedback			✓
Multi-spark ignition			✓

APPLICATION NOTES

The Ignitor III is a high performance ignition system, and although the installation is not complicated, there are some specific requirements. For optimal performance the Ignitor III requires a minimum of 12 volts. Vehicles equipped with a resistance wire or ballast resistor, should be modified as outlined in the instruction manual. Install the PerTronix ignition power relay part # 2001 for a simple, reliable power source.

- For use on most 8 cylinder engines
- 12 volt negative ground systems
- Requires 12-14 Volts
- Must use suppression core ignition wires
- Not for use with CD or multiple spark systems
- Lobe sensor design triggers off the point cam or reluctor and does not require a magnet sleeve
- Not intended for marine use.

IGNITION POWER RELAY

Adding a PerTronix power relay will eliminate the need to dig through the wiring harness and replace wires. Plus, the power relay guarantees maximum system voltage for more power. See page 23 for more info.

Description	Part No.
Ignition Power Relay	2001

APPLICATIONS BY DISTRIBUTOR TYPE

Ignitor III applications can be determined by knowing the distributor manufacturer and specifics. It's common to swap out or upgrade distributors in search for more performance, we understand this and have developed an application guide based on each distributor, OE or aftermarket.

DELCO DISTRIBUTORS

This kit takes just a few minutes to install and is hidden entirely under the distributor cap. Developed for 1957-74 Delco point type distributors with mechanical advance weights on top. Fits both single and dual point distributors.

1957-74 V8 single or dual point, vacuum adv distributor CW & CCW rotation 71181

MOTORCRAFT DISTRIBUTORS

We have developed several Ignitor III kits to fit the most common Motorcraft distributors. The Ignitor III is simple to install, even easier than points, which means you can drive more and tune less.

1949-53	Flat Head single point, vacuum adv distributor	CW rotation	71283
1954-56	Y block single point, vacuum adv distributor	CCW rotation	71282
1957-74	V8 single point, vacuum adv distributor	CCW rotation	71281
1960-72	V8 dual point, vacuum and non vacuum distributor	CCW rotation	71281D

HOLLEY GOLD BOX DISTRIBUTORS

Holley gold box distributors have never before been known for their performance or reliability... until now. We've developed this Ignitor III system to replace the factory electronics and fit entirely within the distributor.

1972-81 Factory electronic gold box distributor CW rotation 7HO-181

AUTOLITE AND CHRYSLER DISTRIBUTORS

Our applications for autolite and chrysler distributors feature a completely redesigned advance plate assembly utilizing a custom nylon glide hub which provides smooth trouble free operation.

1959-75	V8 single point, vacuum adv Chrysler distributor	CW & CCW rotation	71381A
1951-73	V8 dual point, vacuum adv Autolite distributor	CW & CCW rotation	71385

MALLORY POINT TYPE DISTRIBUTORS

Tired of replacing points in your Mallory single or dual point non-vacuum distributor? Want more power? Our Ignitor III conversion will install in just minutes and has all the features you expect from a high performance ignition but fits entirely in the distributor. Not recommended for use in marine applications.

All 8 cylinder 25, 26, YD, YL single or dual point distributor CW & CCW rotation 7ML-181

FOOTNOTES

2 Factory electronic ignition
5 Canadian models only
8 Single point distributor

10 Dual point distributor
19 Mechanical advance at top of shaft
22 Clockwise rotation

72 Fits both single point and dual point distributors
96 With factory Holley gold box ignition

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models. To assist in selecting the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Applications are based on the vehicle's original equipment. If an aftermarket distributor is being used, reference page 22 of this catalog.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or ring.
- Most applications have Ignitor and Ignitor II kits available. These kit part numbers are found in there respective columns. Turn to page 3 for feature comparison chart.
- Unless otherwise noted, the part numbers in this catalog represent 12-volt negative ground kits. Many of our Ignitor applications are also available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add a N6, P6 or P12 suffix to the part number when ordering. Positive ground and 6-volt negative ground kits are not available for Ignitor II applications.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not found please contact us at (909) 599-5955 for information on possible new or custom kits that may be available.

FOOTNOTES

1	Excluding California models	36	Excluding distributor number 1112314	63	With four lobe point cam
2	Factory electronic ignition	40	With "straight" point set	64	With three lobe point cam
5	Canadian models only	43	Odd fire engine	65	With eight lobe point cam
8	Single point distributor	55	Also available in 6-volt negative ground add N6 to part number	71	Late DM2 distributor with one piece point set
10	Dual point distributor	56	Also available in 6-volt positive ground, add P6 to part number	72	Fits both single point and dual point distributors
13	Lobe sensor module	57	Also available in 12-volt positive ground, add P12 to part number	79	Ignitor II applications can not be used with solid core ignition wires
14	European models only	59	Single distributor applications	85	Point cam felt bracket removal required
15	Excluding lean burn computer controlled engines	60	Dual distributor applications	86	Requires modification to distributor
16	Mechanical advance under breaker plate	61	Kit contains one module for each distributor	88	Ignitor III kit available see page 4 for details
18	Excluding 215 and 300 cid. engine	62	With six lobe point cam	94	Enables one distributor to control timing and advance for both cylinder banks.
19	Mechanical advance at top of shaft				
35	Special keeper no. MR-122K required for distributors without distributor cap

FOOTNOTES

2	Factory electronic ignition	24	Counter clockwise rotation	57	Also available in 12-volt positive ground, add P12 to part number
4	Non fuel injection models	27	Screw down cap	68	Overhead view of distributor shaft 
5	Canadian models only	28	Clip down cap	69	Overhead view of distributor shaft 
8	Single point distributor	31	Remote mount coil conversion kit included	70	Early DM2 distributor with two piece point set
10	Dual point distributor	33	Vacuum advance distributor	71	Late DM2 distributor with one piece point set
13	Lobe sensor module	34	Non vacuum advance distributor	72	Fits both single point and dual point distributors
14	European models only	35	Special keeper no. MR-122K required for distributors without distributor cap	79	Ignitor II applications can not be used with solid core ignition wires
16	Mechanical advance under breaker plate	55	Also available in 6-volt negative ground add N6 to part number	86	Requires modification to distributor
17	Small cap distributor	56	Also available in 6-volt positive ground, add P6 to part number	88	Ignitor III kit available see page 4 for details
19	Mechanical advance at top of shaft			95	2 bolt front mount distributor
20	Large cap distributor				
22	Clockwise rotation				
23	Front mount distributor

FOOTNOTES

2	Factory electronic ignition	34	Non vacuum advance distributor	63	With four lobe point cam
4	Non fuel injection models	36	Excluding distributor number 1112314	64	With three lobe point cam
6	California models only	38	Excluding distributor number IDN-4007	70	Early DM2 distributor with two piece point set
7	Manual trans only	39	With "curved" point set	72	Fits both single point and dual point distributors
9	Excluding California model with auto trans	40	With "straight" point set	79	Ignitor II applications can not be used with solid core ignition wires
10	Dual point distributor	43	Odd fire engine	83	With plastic sliding point plate
13	Lobe sensor module	55	Also available in 6-volt negative ground add N6 to part number	85	Point cam felt bracket removal required
14	European models only	56	Also available in 6-volt positive ground, add P6 to part number	86	Requires modification to distributor
16	Mechanical advance under breaker plate	57	Also available in 12-volt positive ground, add P12 to part number	88	Ignitor III kit available see page 4 for details
17	Small cap distributor	59	Single distributor applications	95	2 bolt front mount distributor
19	Mechanical advance at top of shaft	60	Dual distributor applications	96	With factory Holley gold box ignition
20	Large cap distributor	61	Kit contains one module for each distributor		
22	Clockwise rotation				
24	Counter clockwise rotation				
33	Vacuum advance distributor

We have Ignitor and Ignitor II kits which are made to fit specific distributor types and part numbers. Many of these kits are not tied to a particular vehicle application. If you can't find what you need in the application section of our catalog, use this look up. If its not here, that doesn't mean that we don't have it. If you are interested in a kit for a specific distributor please call (909) 599-5955.

AFTERMARKET DISTRIBUTORS

Not getting the performance you expected out of your “brand name” points distributor? Tired of replacing expensive burnt-out optical modules? Then you have come to the right place. Chances are PerTronix makes an Ignitor or Ignitor II kit to convert your distributor, which will improve reliability and increase your ignition performance.

SERVICE PARTS

Ignitor and Ignitor II service parts are available separately. To order a module kit, add a “0” suffix to the original kit part number. To order a magnet sleeve kit, add a “3” suffix to the original kit part number. Most module adapter plates are stamped with the kit part number.

EXAMPLE:

Original Part Number:	1281
Replacement Module:	12810
Replacement Magnet Sleeve:	12813

Some Ignitor and Ignitor II kits are provided with a rotor to insure proper magnet sleeve engagement. The following kits have replacement rotors available:

REPLACEMENT ROTORS

1361A, 1381A, CH-161, CH-181, 91361A, 91381A, 9CH-161, 9CH-181	1361AR
1581, 91581	1581R
ML-186A, 9ML-186A	ML-184R

IGNITION POWER RELAY

Most pre-1974 vehicles are equipped with OE resistance wires which limit the current for breaker point operation. PerTronix’s Ignitor II and III ignition systems require a full +12V power connection between the ignition switch and the positive coil terminal. This requires bypassing the ballast resistor or resistance wire. In many cases, the original resistance wire is buried in the vehicle’s wiring harness. Adding a PerTronix power relay will eliminate the need to dig through the wiring harness and replace wires. Plus, the power relay guarantees maximum system voltage for more power.

This 30 AMP relay kit can also be used with the original Ignitor conversion kits as well. The benefits in addition to easier installation are as follows:

FEATURES

- Easy to follow instructions make installation simple
- Minimizes conducted voltage spikes by isolating the ignition power source from other high current equipment
- Provides consistent full battery voltage... No more voltage fluctuations from overloaded ignition switches
- Eliminates problems from worn-out and corroded ignition switches, connectors and wires
- Universal design... Works with most battery ignition systems
- Small size... Keep your engine bay looking stock

<u>Description</u>	<u>Part No.</u>
Ignition Power Relay	2001

FOOTNOTES

10 Dual point distributor	64 With three lobe point cam	91 Excluding distributor numbers 2571501 & 2571601
26 Excluding distributor number YL670AV	65 With eight lobe point cam	
33 Vacuum advance distributor	79 Ignitor II applications can not be used with solid core ignition wires	
34 Non vacuum advance distributor	88 Ignitor III kit available see page 4 for details	
63 With four lobe point cam		

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models. To assist in selecting the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Applications are based on the vehicle's original equipment. If an aftermarket distributor is being used, reference page 22 of this catalog.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or ring.
- Most applications have Ignitor and Ignitor II kits available. These kit part numbers are found in their respective columns. Turn to page 3 for feature comparison chart.
- Unless otherwise noted, the part numbers in this catalog represent 12-volt negative ground kits. Many of our Ignitor applications are also available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add a N6, P6 or P12 suffix to the part number when ordering. Positive ground and 6-volt negative ground kits are not available for Ignitor II applications.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not found please contact us at (909) 599-5955 for information on possible new or custom kits that may be available.

FOOTNOTES

2	Factory electronic ignition	56	Also available in 6-volt positive ground, add P6 to part number
21	See page 70 for complete replacement distributors	57	Also available in 12-volt positive ground, add P12 to part number
22	Clockwise rotation		
24	Counter clockwise rotation		
55	Also available in 6-volt negative ground add N6 to part number	79	Ignitor II applications can not be used with solid core ignition wires

APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models. To assist in selecting the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Applications are based on the vehicle's original equipment. If an aftermarket distributor is being used, reference page 22 of this catalog.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or ring.
- Most applications have Ignitor and Ignitor II kits available. These kit part numbers are found in there respective columns. Turn to page 3 for feature comparison chart.
- Unless otherwise noted, the part numbers in this catalog represent 12-volt negative ground kits. Many of our Ignitor applications are also available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add a N6, P6 or P12 suffix to the part number when ordering. Positive ground and 6-volt negative ground kits are not available for Ignitor II applications.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not found please contact us at (909) 599-5955 for information on possible new or custom kits that may be available.

FOOTNOTES

21	See page 70 for complete replacement distributors	55	Also available in 6-volt negative ground add N6 to part number	79	Ignitor II applications can not be used with solid core ignition wires
22	Clockwise rotation	56	Also available in 6-volt positive ground, add P6 to part number	82	Will not fit magneto type distributors
24	Counter clockwise rotation	57	Also available in 12-volt positive ground, add P12 to part number		
28	Clip down cap				
30	Excluding distributor number 1112594
